

VISION EYE INSTITUTE BRISBANE

LOW COST INJECTION CLINIC

CALL (07) 3736 3012

Struggling to afford the cost of eye injections?

Our low cost clinic is suitable for patients who require eye injections (intravitreal injections) to treat a condition such as wet macular degeneration, diabetic eye disease or vein blockage.

Transforming lives. That's our vision.

SPECIALIST EYE CARE

Eye injections (also called intravitreal injections) are used to treat a number of potentially blinding eye conditions, including macular degeneration (wet), diabetic eye disease and vein blockages.

A regular, ongoing course of injections is usually required to preserve vision.

Unfortunately, around 26% of patients stop treatment after only six months, which may increase the risk of blindness.* This is often due to cost, inconvenience and difficulty in accessing appointments for treatment. At Vision Eye Institute Brisbane, access to eye injections has never been more affordable or accessible.

HOW THE CLINIC WORKS

- We welcome new patients and patients who are already receiving eye injections to treat a medical condition.
- Patient care is provided by our specialist ophthalmologists, supported by our highly trained clinical and admin teams.
- Appointments are available weekdays during clinic hours.
- A referral is required from an optometrist or GP for the initial consultation. Fees apply for initial consultations; however, a Medicare rebate is available with a current referral.
- Following the initial consultation, all subsequent injection appointments are capped at \$100 out-of-pocket expense per appointment. This includes the consultation and any required scans, but it does not include the cost of the injection medication.

Transferring into the clinic is easy

Simply contact our clinic and our friendly staff will talk you through the process.

Call us on (07) 3736 3012 today.

All medical and surgical procedures have potential benefits and risks. Check with your ophthalmologist before proceeding.

CONVENIENTLY LOCATED

Our clinic is located only 2.5 kilometres west of Brisbane's CBD and is easily accessible by car. There is a multi-level carpark on-site (enter via Wienholt St). Street parking is also available on Munro St, Wienholt St, Grimes St and Ridley St.

Bus route 470 (City-Toowong) stops opposite our clinic at the corner of Milton Rd and Grimes St (stop 10), and Auchenflower Railway Station (Ipswich/Springfield line) is a 5-minute walk away.

For people with limited mobility, the multi-level carpark provides easy access to our clinic reception.
