

GENERAL INFORMATION

BORONIA CLINIC

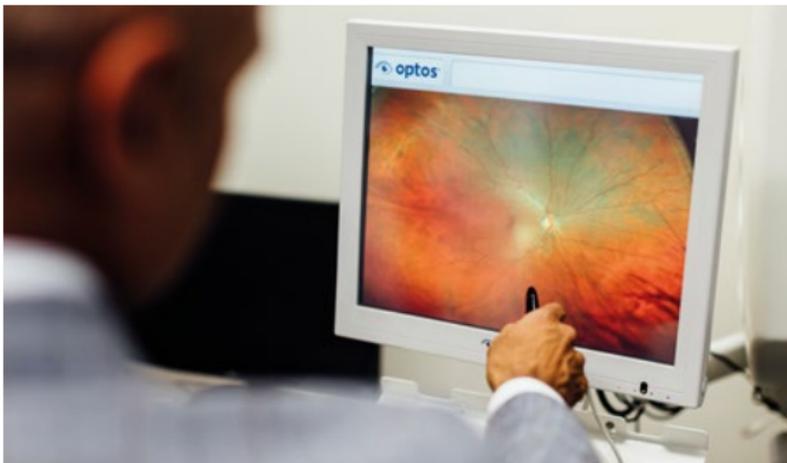

SPECIALIST EYE CARE FOR PATIENTS

Located in the Melbourne Eastern Healthcare facility, Vision Eye Institute Boronia features the latest in ophthalmic technology and equipment. We offer testing and treatment for retinal conditions, cataracts, glaucoma and a range of more general eye conditions.

Our clinic also provides intravitreal eye injections and scans at no out-of-pocket expense. This means that you will only pay the PBS prescription cost if you have a referral from your GP, optometrist or another medical specialist.

High-quality care

Vision Eye Institute is committed to delivering personalised, safe, high-quality care. To minimise patient risk, and to monitor and improve the quality of our services, we have established robust quality management systems. We place great value on patient feedback. Please let our reception staff know if you wish to provide feedback about our service – we welcome and appreciate your input.

FULL-SERVICE CLINIC

In addition to offering general eye checks, our clinic offers testing and treatment for a range of more complex eye conditions, with many procedures performed on-site in our consulting and treatment rooms. We also offer eye injections and scans at no out-of-pocket expense, with a referral from your GP, optometrist or another medical specialist.

RETINAL CONDITIONS

We specialise in treating conditions that affect the retina (the light-sensitive tissue at the back of the eye) and macula (the part of the retina responsible for central vision). These include age-related macular degeneration, epiretinal membrane, macular hole, floaters, retinal detachment, posterior vitreous detachment and diabetic retinopathy. Many of these conditions can be sight-threatening and require urgent treatment. Depending on your condition, we may recommend eye injections, retinal laser treatment or sutureless retinal surgery.

If you are transferring from another clinic for eye injections, you will need an initial consultation with Dr Devinder Chauhan prior to your first treatment. Most patients receiving an eye injection will be in the clinic for approximately 30 to 45 minutes. You will not be able to drive after an eye injection, so please make other arrangements to get home.

GLAUCOMA

While glaucoma cannot be cured, treatments can generally control or slow disease progression. Increased pressure inside the eye causes damage to the optic nerve and leads to irreversible vision loss. Treatment involves lowering eye pressure by improving fluid drainage. Most patients can manage their glaucoma with medicated eye drops, but sometimes another type of treatment is necessary. Your doctor may recommend laser treatment, filtration surgery or minimally invasive glaucoma surgery (e.g. iStent) to improve fluid drainage from the eye.

CATARACT & LENS SURGERY

Cataract treatment involves keyhole surgery to remove the cloudy lens, which is replaced with an artificial intraocular lens. Cataract surgery is the most common eye surgery performed in the world and has a high success rate. In some cases, our surgeons can help patients get rid of their reading glasses by using the latest lens options.

GENERAL EYE HEALTH

Patients can also have a comprehensive eye check at our clinic and treatment for more general eye conditions.

All medical and surgical procedures have potential complications. Check with your ophthalmologist before proceeding.

HIGHLY EXPERIENCED SPECIALISTS

Doctor partners

Dr Devinder Chauhan

Medical Retina, Vitreoretinal Surgery,
Cataract Surgery

Dr Chauhan is a UK- and Australian-trained retinal and macular specialist with over 20 years of experience in all aspects of vitreoretinal disease.

Dr Lei Liu

Glaucoma, Cataract Surgery,
General Eye Health

Dr Lei Liu has expertise in glaucoma and cataract surgery, including combined procedures to treat both conditions. She also diagnoses and treats a range of more general eye conditions.

CONVENIENTLY LOCATED

Our clinic is located within the Melbourne Eastern Healthcare facility, close to Eastlink. There is plenty of free parking on-site. Alternatively, you can take the 753 bus or walk (20 minutes) from Bayswater train station.

The clinic has easy access for people with limited mobility.

Other services within the facility include general practice (GPs), cardiology, pharmacy, audiology, podiatry, physiotherapy, psychology, dietitians, dentists, diabetes educators, health coaches, financial planning for seniors and an on-site cafe.
