

OUR DOCTORS

Dr Lee Lenton

MBBS FRANZCO FRACS

Dr Lee Lenton is an Australian-trained ophthalmologist with a special interest in cataract and refractive surgery. With decades of surgical experience and expertise across a broad range of procedures, he is known for his precision, innovation and unwavering commitment to delivering exceptional patient care.

BACKGROUND

Dr Lee Lenton is a highly respected cataract and refractive surgeon with a distinguished career spanning several decades. He earned his Bachelor of Medicine and Surgery from the University of Queensland before completing ophthalmology training at the Princess Alexandra Hospital and Mater Hospital in Queensland.

Since 1995, Dr Lenton has performed more than 15,000 laser eye procedures, establishing himself as a leader in vision correction. An expert in refractive lens exchange and cataract surgery, he is recognised for his advanced proficiency in intraocular lens (IOL) technology. Over the past five years, he has specialised in multifocal IOL techniques, performing more than 4,000 trifocal IOL insertions.

Dr Lenton's expertise also extends to the management of a wide range of ocular surface diseases, including keratoconus, dry eye, red eye, corneal ulcers and chronic conjunctivitis. He has undertaken pioneering research into the use of medicated honey as a therapeutic treatment for chronic blepharitis and dry eye, both before and after laser eye surgery and cataract surgery.

In addition to his clinical work, Dr Lenton is dedicated to the education and training of future eye care professionals. He serves as a visiting clinician and lecturer at the Department of Optometry and Optometry Clinic at Queensland University of Technology. Actively involved in research, Dr Lenton is currently completing a PhD entitled *Statistical Analysis of Refractive Data*, which focuses on enhancing outcomes and precision in refractive surgical techniques.
